

Bahco (BAHBH4G2)

# BH4G2 Hydraulic Bottle Jack 2T

The Bahco Hydraulic Bottle Jack with a welded structure ensures better performance and prevents oil leakages. The steel forged base provides great wear and impact resistance. An extension screw allows precise height adjustment whilst the serrated saddle provides a secure lifting grip. A safety valve prevents the ram from being overextended which would cause damage to the piston. Suitable for working in a vertical position. CE certified by Official Independent Technical Inspection Association. The Bahco BH4G2 Hydraulic Bottle Jack has the following specifications: Maximum Load: 2 Ton / 2 000kg; Height Range: 181 - 344mm; Operating Conditions: 20 C to 50 C; Weight: 24kg.
