

Bulldog (BULPD5CLINR) Insulated Treaded Cable Layer

The Bulldog Insulated Treaded Cable Layer is the perfect tool for any contractor in need of a reliable and heavy duty cable laying shovel. Forged from one piece of steel with an epoxy paint coating to provide optimum protection against corrosive substances, the shovel has round corner blades to reduce penetration damage to underground pipes and cables. The treads on this tool enable you to use more force and also acts as boot protection. Fitted with a one piece heavy duty fibreglass YD handle. Manufactured to BS8020. Individually tested to 10 000 volts, guaranteed to 1 000 volts, and supplied with a Certificate of Conformity.
