

Teng (TEN380072N)

Steel Ratchet 72 Teeth 3/8in Drive

This Teng Steel Ratchet is manufactured from chrome vanadium steel for optimum durability. It is ideal for use in confined spaces with 72 teeth and 5 increments. Several teeth are engaged simultaneously, which means a greater force can be used without risk of damage.

The ratchet has an improved reverse switch, allowing quick and easy direction change, even with gloves on. The head is sealed, which prevents dirt and dust entering the mechanism, giving longer life and trouble-free use.

The button for quick socket release is level with the ratchet head, which prevents accidental button activation and the loss of the socket. The ergonomic two-component handle provides a firm grip.

The ratchet is of a very high quality and can handle torque at DIN 3122D standard. Specifications: Drive: 3/8in

No. of teeth: 72

Length: 203mm (8in)

Weight: 265g
