

Product Specifications

Mindray C1A Fully Automatic AED Bundle with Wall Bracket

- **Comprehensive AED Station** – Includes an AED, responder kit, posters, signs and two wall brackets.
- **Mindray C1A AED** – Station is supplied with a fully automatic Mindray C1A AED to provide life-saving intervention.
- **Sturdy Wall Brackets** – Secure mounting for the Mindray with a clear defibrillator label, plus a separate bracket for the AED Responder Kit.
- **Contains Multiple Signs and Posters** – The two posters and three signs included not only notify visitors of the location of the AED but also enable untrained personnel to feel confident during emergency use.
- **Ideal For** all workplaces and public environments.

The **Mindray C1A Fully Automatic AED Bundle with Wall Bracket** is a complete, ready-to-install solution designed to ensure a company's defibrillator is highly visible, securely stored and immediately accessible when every second counts. Ideal for workplaces, schools and public-facing environments, this bundle combines the trusted Mindray C1A AED with dedicated wall brackets and clear signage to support rapid emergency response. By providing a clearly identified AED location and intuitive access for both trained and untrained responders, it helps organisations demonstrate a proactive approach to health and safety, duty of care and emergency preparedness. **Key Benefits**

- **Comprehensive preparedness** – this bundle includes all the necessary components to create a visible and accessible AED station.
- **Ensures quick action in emergency situations** – having the AED clearly located with the addition of signs around the building and information about qualified first aiders allows action to be taken quickly and effectively during an emergency by those in the vicinity.
- **Includes an AED Responder Kit** – ensures staff have access to essential items such as a face shield and clothing cutters to support effective casualty treatment.
- **Enables user confidence** – the bundle includes instructional materials tailored to untrained users, which helps reduce hesitation in emergencies. The AED itself is also designed to speak and guide through the process.
- **Encourages a proactive safety culture** – having an AED on site demonstrates a businesses consideration for the health and wellbeing of their staff and visitors, while the signage and posters increase awareness and confidence to act.
- **Wall-mountable** – the wall brackets (provided in the bundle) mean that the AED and kit are stored in a fixed, obvious location, protected from accidental damage while remaining easy to access.
- **Value for money** – this bundle includes not only an AED, but also signs, posters, brackets, and an AED Responder Kit, ensuring staff have everything they need in an emergency.
- **Provides peace of mind** – knowing there's an AED onsite reduces anxiety among employees and customers, especially in organisations with older populations, visitors, or in higher-risk environments.

Why Have an AED in the Workplace? UK workplaces should have an AED (Automated External Defibrillator) because it significantly improves emergency response, demonstrates duty of care, and supports a safer working environment. They are increasingly regarded as an essential part of modern workplace, helping to save lives, supporting risk assessments, and clearly demonstrating an employer's commitment to health and safety. **Bundle Includes**

- 1 x Mindray C1A Fully Automatic AED – designed to administer the first shock in under 8 seconds.
- 1 x AED Responder Kit including items such as a face shield and clothing cutters to ensure that the first aider has everything they need to treat the casualty.

- 2 x Durable laminated posters with full colour illustrations — the AED Defibrillation & CPR Poster and the AED for Untrained Personnel Poster. These posters are both 59cm x 42cm in size.
- 1 x AED Trained Personnel Sign with space to add the details of up to five personnel trained to use the defibrillator. This sign is 20cm x 30cm in size.
- 1 x Nearest AED Sign to denote the location of the AED, increasing visibility of the device. There is space to include the detailed location of the AED and the name of the person in charge of its maintenance.
- 1 x AED Sign to increase visibility of the AED.
- 2 x Wall Brackets to securely wall-mount the defibrillator and AED responder kit in a visible and easily accessible location out of the way of potential damage.
