STATUTORY REGULATION

This product is a cosmetic product regulated by and complying in GB with the GB Cosmetics regulation (Schedule 34 of the Product Safety and Metrology etc. (Amendment etc.) (EU Exit) Regulation 2019 (as amended)) & in ROI/NL with EC No 1223/2009 (as amended) on Cosmetic Products.

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information please refer to the Safety Data Sheet which can be downloaded from <https://www.scjp.com/en-gb/safety-data-sheets>

SHELF LIFE

This product has a shelf life of 30 months from the date of manufacture when stored unopened at room temperature.

QUALITY ASSURANCE

SC Johnson Professional products are manufactured in facilities which follow appropriate quality assurance practices, including with respect to quality control processes for raw materials and finished goods, and comply with any regulatory requirements applicable to the manufacturing of such products.

PRODUCT SAFETY ASSURANCE

Product Safety Assessment

The product has been assessed by an independent toxicologist and is declared safe for intended use on body and face of adults and children aged over 6 months when used as directed, meeting all relevant regulatory requirements.

Skin Compatibility Test

Independent dermatological tests conducted to assess the skin compatibility of the product using voluntary test persons in occlusive, 96 consecutive hour application models, shows the product to be non-irritating in use.

COMPATABILITY TESTS

Rubber Production Process Compatibility

In testing conducted by the Deutsches Institut für Kautschuktechnologie (DIK) in accordance with DIN 53530, the use of Stokoderm® SUN PROTECT 50 *PURE* cream in rubber production process does not influence the cohesive strength of rubber.

EFFICACY TESTS

Assessment of UVA-PF In vitro

Determined according to ISO 24443: 2021.

UVB Efficacy Test in vivo

Using the International Standard for determining the sun protection factor (ISO 24444:2019) the SPF was determined along with the claim for water resistance.

UVC Efficacy Test in vitro

Using a modified ISO 24443:2021 method, the trapezium rule was used to confirm that the product provides a distinctly lower transmission of UVC range >200nm.

SPECIAL NOTE: UV protection creams even with high SPF, do not offer full protection against UV rays and do not replace the need for using/ wearing appropriate personal protective equipment and clothing.

Water Resistance Test

Determination of the SPF factor according to ISO 24444:2019 (E) before and after water application to volunteers in a spa pool for 2 x 20 minutes, confirms that this sun protection is water-resistant.

Caution: Applying an insufficient amount of product reduces the protective performance. Over-exposure to the sun is a serious health threat. Even sunscreen with a high SPF does not offer full protection against UV rays and does not replace the need to use/wear appropriate personal protective equipment and clothing. Avoid excessive UV exposure. Keep babies and young children out of direct sunlight and wear protective clothing. Avoid eye contact.
