# TG5570

**HEAVYWEIGHT CUT LEVEL F LIQUID-RESISTANT BI-POLYMER DOUBLE-LAYER THERMAL GLOVE**

**HIGH CUT RESISTANCE** F

- Touchscreen
- Superior Grip
- X-Dura Bi-Polymer
- Thermal Comfort
- Dual-Layer
- Extended Durability
- TraffiSystem® SAFETY IN COLOURS
- Engineered Yarn
- 10gg/15gg
- Sizes 7-11

## HEAVYWEIGHT CUT LEVEL F LIQUID-RESISTANT BI-POLYMER DOUBLE-LAYER THERMAL GLOVE

HIGH CUT RESISTANCE

- **Dual-Layer**
  Double-layer construction combines a high-performance engineered cut-resistant outer liner with a soft brushed acrylic terry inner liner, delivering high cut protection together with enhanced warmth and comfort in cold working environments.
- **Cut Level F / A6 Protection**
  High-performance engineered cut-resistant yarn provides Cut Level F/A6 protection, offering a high level of resistance against cut hazards encountered during demanding industrial handling applications.
- **Thermal Comfort**
  Soft brushed acrylic terry inner lining traps warm air close to the hand, providing effective thermal insulation and improved comfort during prolonged use in cold working conditions.
- **Engineered Yarn**
  Advanced cut-resistant fibres provide an excellent balance of cut protection, flexibility and dexterity, helping maintain comfortable hand movement during demanding handling tasks.
- **X-Dura Bi-Polymer**
  Specially engineered nitrile and latex bi-polymer coating combines the durability of nitrile with the flexibility and grip characteristics of latex for enhanced comfort and handling performance.
- **Superior Grip**
  Optimised bi-polymer grip surface provides excellent traction in both dry and wet conditions, supporting secure, controlled handling and reducing the effort required to maintain grip.
- **Extended Durability**
  Durable coating and engineered liner construction provide increased resistance to abrasion and wear, supporting longer glove life during repetitive and demanding industrial applications.
- **Touchscreen**
  Touchscreen-compatible construction allows compatible devices to be operated without removing the glove, improving convenience and productivity in the workplace.
- **Secure Cuff**
  Elasticated knitted wrist provides a close and secure fit while helping minimise the entry of cold air, dirt and workplace debris.
- **Traffi Colour System**
  Green colour coding in line with the Traffi colour system enables quick identification of high cut-resistant hand protection for correct task selection.

### Technical Specifications

| | |
|---|---|
| **Size Range** | 7-11 |
| **Machine Gauge** | 10gg Terry/15GG |
| **Liner** | 45% Acrylic, 30% HPPE, 10% Nylon, 10% Steel, 5% Elastane |
| **Coating** | 80% Nitrile & 20% Latex |
| **Colour** | Green/Black |

### Cuff Edge Colours
